NEXTEP

Paying with cryptocurrency has never been easier.

What is NEXTEP ?

NEXTEP is a French company developing technological and cryptographic innovations that aim to democratize cryptocurrency payments.

Our FinTech has developed its leading innovation, a cryptocurrency software package.

Currently, cryptocurrency is not used for its initial function, which is for payments in daily life, the next step in terms of economic transactions.

NEXTEP is the solution to this problem.

Our goal :

To become the world leader in cryptocurrency payments.

THE NEXTEP ECOSYSTEM

NEXTEP develops—through its various poles—an ecosystem of its own, which ensures independence, reliability, security and transparency.

❖ NEXTEP's payment software can be integrated with Android-based payment terminals.

❖ The NEXTEP payment application allows customers to pay simply, quickly and securely.

❖ The NEXTEP blockchain guarantees the security, transparency and independence of our ecosystem.

❖ CXS, the native cryptocurrency of our blockchain, is used for internal transactions.

❖ The mobile application will offer a listing of all partners' businesses on a MAP in order to promote their visibility.

❖ The NEXTEP token will be used as a means of payment during transactions with merchants.

NEXTEP HAS FOUND THE SOLUTION

With its revolutionary payment software, NEXTEP has found the solution to keeping up with progress and allowing everyone to pay for their purchases in cryptocurrency.

- This **unique software** will allow any Android-based payment terminal to receive cryptocurrency.

- The transfers are supported by the NEXTEP blockchain, which works under a consensus proof of authority system that has been recognized as of one of the most **ecological** solutions since it does not require any form of mining.

- The merchant selects the NEXTEP application which has been previously integrated into the payment terminal, enters the amount of the purchase made in the specific currency, and then a QR code will be displayed.

- The customer scans the **QR code** via their NEXTEP payment application and validates the transaction.

- The merchant receives the payment notification on their terminal.

- The merchant does not see the amount in cryptocurrency, nor the conversion made, **so their habits will not be modified**; instead, they will only see the amount in the currency they have received. They will be able to receive a bank transfer when desired, as well as an accounting sheet listing all the transactions.

- A **dashboard** will be available to the merchant so that they can have digital access to their customer files and all their transactions.

THE NEXTEP SYSTEM

- The cryptocurrency is automatically transfered via the terminal, directly to the NEXTEP crypto wallet.

- The entire process is instantaneous and invisible to the merchant.

- The customer makes the payment in cryptocurrency at the merchant through the NEXTEP app.

- All they have to do is scan the QR code on the merchant's payment terminal, then confirm the transaction on their app.

- The cryptocurrency is converted into FIAT currency by NEXTEP.

- The funds are sent back in FIAT currency via a bank transfer to the merchant's business account.

- The merchant also receives an accounting record detailing all cryptocurrency payments.

OUR GOAL

Integrate our software into all payment terminals and become **the leader** in cryptocurrency payments.

- Through its cryptocurrency payment system NEXTEP is **ahead** of its time.

- We are the precursors of the future, the next **monetary revolution**.

- Cryptocurrency payments will be **inevitable** in tomorrow's world, and NEXTEP will ensure it has a role in this **advancement** and as such will lie at the very **forefront** of this market segment

PAYMENT TERMINAL IN NUMBERS

- The payment terminal has become an indispensable device for all merchants.

- Currently, there are more than 100 million payment terminals sold worldwide, and these are replaced every 5 years on average.

- More than 70 % of these terminals run on the Android operating system.

- In France, between 2015 and 2019 the number of payment terminals increased by 39%.

- NEXTEP plans to acquire 10.000 partners in its first year.

Number of payment terminals in France.

Forecasted distribution of NEXTEP payment software.
THE ADVANTAGES OF THE NEXTEP PAYMENT SOFTWARE.

Greater visibility for merchants, thanks to our community application on which they will be visible to all users.

A new and growing customer base that wants to pay in cryptocurrency.

Reliable, secure and easy to use.

No knowledge of cryptocurrency on the part of the merchant is required to use our system

A monthly subscription at an attractive price including merchant accounting.

No hidden charges.

NX CHAIN

- NEXTEP has launched its own blockchain, the NX CHAIN, based on the Proof of Authority consensus mechanism and using Layer 2 technology.

- The functionality of the latter allows it to interface with all wallets in the cryptographic industry, thanks to its full support of the EVM (Ethereum Virtual Machine) system. This entity allows the network to be continuously updated according to the transactions and interactions included in the blocks.

- The NX CHAIN is a scalable blockchain that will be the heart of our ecosystem, ensuring reliability, security, independence and transparency.

- https://github.com/NEXTEP-CXS
NX CHAIN

NX CHAIN

- Due their ability to absorb large numbers of transactions, Layer 2 technologies are not only effective as payment networks, but also for hosting decentralized applications.

- Layer 2 solutions can process thousands of transactions after validation on a parallel blockchain, with the records then transferred to the main blockchain, thereby guaranteeing their immutable record.

- The user experience is more user-friendly thanks to a higher rate of transactions per second, lower gas charges, and the guarantee that all transactions once completed are irreversibly recorded on the main network.

- The NEXTEP blockchain will gradually integrate other projects into its ecosystem, as it seeks to be a showcase and repository for the most promising and innovative projects of the cryptographic sphere, which is why each request for the introduction of crypto assets into our ecosystem will be preceded by a rigorous examination and audit conducted by our developers.

CXS

- The CXS (Coin NEXTEP Swap) is the native coin of the NX CHAIN blockchain, it will be used to buy, via our DEX (decentralized exchange), tokens and cryptocurrencies, and will also be essential to obtaining the NEXTEP token.

- The CXS will first be offered for sale via a presale on our own website, which will take place from October 3, 2022 to February 7, 2023, and will then be exchangeable on our DEX and on the centralized L-Bank exchange. No fees will be applied to the purchase and sale of the CXS coin.

- The CXS will also be used for the proper functioning of the Blockchain, including gas costs.

CXS TOKENOMICS

The total supply of CXS is 1 billion coins, which will be distributed as follows.
PRESALE : 42%

MARKETING & DEVELOPMENT : 20%

SERVERS : 10%

TEAM : 10%

RESERVE : 8%

DEX NEXTEP : 5%

LISTING CEX : 5%

THE NEXTEP DEX

- **The DEX (decentralized exchange) completes the NEXTEP ecosystem.**

- **NEXTEP's decentralized exchange platform is used for crypto transactions and allows users to buy and sell cryptocurrency.**

- **This platform is fully autonomous and uses smart contracts to communicate with the NX CHAIN.**

- **CXS will be the currency of exchange for any cryptocurrency purchase made on the NEXTEP DEX.**

NEXTEP TOKEN

Initially, the NEXTEP token was largely used to finance the various developments of the NEXTEP company, with this tokenization enabling the independence of NEXTEP's FinTech.

This token saw the light of day on February 2, 2022 during the pre-sale, and was then introduced on the DEX (decentralized exchange) of the BSC (Binance Smart Chain) and Pancakeswap.

NEXTEP has been part of the BSC Blockchain since its official launch and will be an integral part of the NX CHAIN Blockchain as of February 9, 2023. It will therefore be exchangeable via the NEXTEP DEX as well as on the L-BANK centralized exchange.

When the NEXTEP payment software is made official, this token will be the main payment method used on it.

FEE DISTRIBUTION (CURRENTLY ON THE BSC).

PURCHASE FEES (6%)	SALES FEES (12%)	DISTRIBUTION
2%	4%	DEVELOPMENT
2%	4%	LIQUIDITY
1%	3%	MARKETING
1%	1%	KITTY

FEE DISTRIBUTION ON THE NX CHAIN

PURCHASE FEES (4%)*	SALES FEES (4%)*	DISTRIBUTION
1,5%	1,5%	DEVELOPMENT
1%	1%	NFT REWARDS**
1,4%	1.4%	MARKETING
0.1%	0.1%	KITTY

Thereafter, these fees will be reduced.

* A function on the smart contract of the new NEXTEP token on the NX CHAIN Blockchain blocks the fee increase.

**150 NEXTEP NFTs have been put up for sale and all are entitled to 1% rewards on all purchases and sales of NEXTEP.

NEXTEP TOKENOMICS

**The total supply of NEXTEP is 87,5 billion tokens, which will be distributed as follows.**

HOLDERS*: 33%

CEX LISTING **: 22.5%

TEAM: 11.5%

MARKETING & DEVELOPMENT: 23%

NEXTEP DEX: 10%

The current holders (on the BSC) of the NEXTEP token. The percentage held by them can vary according to the evolution until the migration.

**CEX: Centralized Exchange. A part of this percentage is dedicated to the listing on the centralized exchange L-BANK, and the other part for future listings.*

- TEAM 11.5%
- HOLDERS 33%
- CEX LISTING 22.5%
- NEXTEP DEX 10%
- DEVELOPMENT & MARKETING 23%

NEXTEP MOBILE APPLICATION

The NEXTEP mobile application will be used mainly as a means of payment and will also have other components including other headings, distributed as follows:

❖ A **MAP** on which users will be able to easily find partner merchants equipped with the NEXTEP payment system. This will promote better visibility for merchants, who will automatically benefit from the commercial showcase that will be our mobile application.

❖ A real-time listing of **the NEXTEP price** and notifications in case of critical price variations.

❖ A real-time listing of **the CXS price**.

❖ All of the NEXTEP's company **NEWS** to preview.

NEXTEP AND ECOLOGY

NEXTEP implements concrete ways to preserve the planet.

———————

✓ The NEXTEP blockchain is based on the consensus proof of authority, which is, for the moment, the most ecological solution.

✓ The NEXTEP website is hosted by a local host, located in France, which offsets carbon emissions by planting trees (ECOWEB certification).

✓ NEXTEP will continue to implement green solutions throughout its evolution.
